

# Taking Your Activities To The Next Level

Do you have a lot of great lesson plans and activities that need to be organized into a curriculum?

Strong activities and resources are key to engaging young people in your program. Program staff regularly produce resources such as written lesson plans, multimedia presentations, or online tools. But often staff members do not have the time to document and organize all their great lessons and activities into a program-wide curriculum. [Development Without Limits \(DWL\)](#) offers a wide range of services that can help you take your activities to the next level by learning how to organize and develop engaging curricula. Some of our services include:

**Curriculum Development:** DWL can help you refine your existing instructional resources by organizing them within topical themes, clarifying learning objectives and linking to supporting activities. We can also work with you to build a program curriculum from scratch based on your program offerings, staff skill sets, and organizational mission and vision. DWL has a long track record of producing high quality curricula for programs that serve all age groups.

**Professional Development:** Our workshop module, *A Living Curriculum I & II* can help your staff learn how to develop activities that are responsive to the needs of your participants. We can also support your program's capacity to facilitate successful youth-led project-based learning.

**Coaching:** DWL can work one-on-one with your team of educators to track their progress and improvement. We can observe staff lead activities, review their activity plans and provide expert feedback with specific enhancements that will impact the quality of your program.

**Online Tools:** Our digital media team can help you ramp up your programs with a 21st century twist by helping you create online learning tools and activities. We can also show you how to use social media to support engagement beyond program hours.

Feel free to contact us to discuss these or many more possibilities.
